

TO: Innovative Solution – ProGuard Customers

FROM: Douglas Hoffman, CEO and Executive Director

NORMI, the National Organization of Remediators and Mold Inspectors, is one of the fastest growing certifying agencies in the country and has been involved in providing high quality training for mold and indoor environmental professionals since 2004. Having trained thousands of construction professionals through the United States, Canada, Europe and South America, NORMI provides over 14 certifications to meet current licensing laws.

As an approved training provider for the EPA and multiple states, NORMI is focused on helping commercial and residential customers find solutions to eliminate mold, viruses, bacteria, and other pathogens to provide a clean healthy indoor environment.

We are very familiar with Innovative Solutions ProGuard Sanitization products. Over the years we have done extensive tests on indoor environments with indoor air quality issues. We have conducted numerous tests that validate the effectiveness of the ProGuard Sanitization System, which utilizes Photo Catalytic Oxidation (PCO) and trademarked Multi-Cluster Ionization (MCI™). These two scientific technologies, when combined and working in synergy, have been proven to be extremely effective at eradicating pathogens in the air and on surfaces.

We have conducted numerous before and after environmental testing, both in the field and under clinical laboratory conditions, which shows that the ProGuard Sanitization Technology effectively eliminates pathogens of all types, including viruses, bacteria, mold, and mildews. Some of the pathogens tested include: Staphylococcus Aureus, E. Coli, Botrytis, MRSA, Salmonella, and many others. Undeniably, the efficacy of these systems far exceeds older technologies and we are proud to endorse their use in any indoor environment.

The ProGuard Sanitization System provides a very safe organic, holistic process that uses a pro-active sanitizing process to continually clean facilities and effectively eliminate pathogens of all types. We highly recommend the ProGuard Air & Surface Purification technology to clients who have air quality or surface contamination concerns and are looking for an effective solution to permanently maintain clean room environments.

Respectfully yours,

D. Douglas Hoffman, Executive Director of NORMI.org
